top. Related. The current version of v2.0.0.3 of MagentOS is, as you can see at the bottom of the... Doing  
this, you will get two auto installs (if they exist). Actually, it doesn't matter if you do it with or without the  
additional installers. Doing this will always give the option to install it the next time you start Magento.

---

Should there be only one? You will probably just need to install it once. The only extra software that will need to be installed is if you want a certain version of it. Where should I find the.exe files for Magento Enterprise? By default they are in the "HKEY\_CLASSES\_ROOT\CLSID\{GUID-HERE}" key under where you installed it. Do you know how I can fix Magento Store? Are you using a different e-commerce platform than Magento? I was having similar issues, I
