It looks like you are using 7zip to start it, which I assume you are using on Windows. When the DTS-HD MA Suite is started under Windows, a control panel appears and you would have to use this to add new input/output devices, change default device type, etc. HTH Q: when user log in to site, there's one page, when user log out, show this page again? hi all I am a beginner, And i use django. So i want to I want to implement the login system. when users log in to site, there's one page (for example : userprofile.html), when users log out, they will be redirect to userprofile.html page again (if they still log in) on the other hand, when users log out, they can't see the url: ", they don't have access to the content, but after some time(maybe one hour), users can log in again. A: you can use sessions for that django docs sessions /* Copyright (c) 2010, Yahoo! Inc. All rights reserved.
