BigInteger is mutable, so it is possible that the number will be changed on some places. When trying to make the query the following exception is thrown: java.lang.NumberFormatException: For input string: "1" So how to compare two BigIntegers in a JPA repository? A: It can be done using greaterThan/greaterThanOrEqualTo, smallerThan/smallerThanOrEqualTo. For example: @Query("select p from Project p where p.number > :number") Tuple findProjectByNumber(@Param("number") BigInteger number);
